

FeedOps Lasoo Marketplace Integration

Managed product data for Lasoo sellers

FeedOps connects your ecommerce catalogue to Lasoo, then prepares, improves and manages the product data required to keep your listings accurate and current.

What FeedOps manages

01 Connect and select Connect agreed ecommerce, ERP, PIM, supplier or file based data. Control the catalogue by category, brand, availability, price, margin or fulfilment capability.	02 Map and improve Use controlled AI to improve taxonomy and attribute mapping for Lasoo. Improve titles, descriptions and other listing content.
03 Validate and maintain Find missing attributes and identifiers, invalid values and incomplete products. Keep catalogue, pricing, promotions and availability current.	04 Monitor and optimise Investigate rejected products, catalogue errors and unexpected changes. Review coverage and data quality for further improvement.

Why FeedOps FeedOps combines specialist feed management with software automation, giving your team one accountable partner for catalogue rules, monitoring and ongoing optimisation. You retain control of pricing, promotions, inventory and fulfilment.

Managed Lasoo feed service

\$1,000 per month plus GST

Lasoo fees and commercial terms are separate. The connection method and any inventory, order or tracking synchronisation are confirmed during onboarding.

Mix and match channels Combine Lasoo with other marketplaces, advertising and media feeds, source systems, destinations and the level of managed support your business needs.
